Summary

Analyst with 3+ years of experience administering enterprise systems, troubleshooting end-user inquiries, and leveraging automated workflows to improve efficiency. Experienced in partnering with stakeholders to translate enterprise needs into revamped systems, applications, and analytics that guide decision-making and modernize business processes.

Work Experience

Independent Data Projects & Professional Development | Dec 2025 – Present

- Ingesting millions of raw data records via token-authenticated REST APIs and transforming JSON payloads into optimized CSV datasets for downstream analytics.
- Designing Power BI dashboards visualizing consumer activity and industry trends to uncover actionable insights.
- Developed a public portfolio showcasing visualizations and data solutions: [Portfolio](#)

Core Systems Specialist | Sun Community Federal Credit Union | Nov 2023 - Nov 2025

- Served as a liaison between internal stakeholders and third-party vendors for online banking and check-clearing conversions, significantly improving processing times for internal staff and customers.
- Identified procedural gaps and improved automated notifications, halving the time required to complete IT system checks.
- Created and maintained documentation, workflow diagrams, intranet web pages, and configuration records to support hassle-free, long-term maintenance of critical systems.
- Resolved hundreds of user requests across all departments, including identifying the root cause of unclear application behavior and coordinating cross-departmental testing efforts for upgrades to the central platform.
- Designed and maintained key performance indicators (KPI)-focused reports and dashboards for company-wide leadership (e.g., accounting, payment processing, and lending) to support decision-making, leading to successful initiatives for personal loan growth and electronic statement adoption.

Workforce Optimization Business Analyst | Axos Bank | Jul 2021 - Sep 2022

- Facilitated process discovery sessions with human resources, credit approval, and vendor management teams to map current workflows, confirm the viability of desired future states, and agree on the scope of work.
- Led daily stand-ups and coordinated development activities with a remote, Mexico-based development team, delivering major upgrades for wire processing and employee management apps.
- Led project check-ins using ad hoc reporting, progress metrics, milestones, and forecasts.
- Developed use cases for user acceptance testing (UAT) to support go-live readiness and updates for internal banking apps (i.e., wire transfer system, human resources employee portal, digital work planner, credit approval system, key performance indicators (KPI) tracking app, vendor management tool).
- Prioritized and cleared a backlog of 200+ action items by analyzing work estimates, task urgency, and business impact, increasing team capacity by ~25%.

Substitute Teacher | Central Union High School District | Dec 2018 – Apr 2021

Adjunct Faculty (Statistics) | San Diego State University – I.V. Campus | Jan 2019 - May 2019

Education

University of Southern California | MS in Financial Engineering | 2018

San Diego State University | BA in Mathematics | 2016

Certifications

dbt Analytics Engineering Certificate | Expected Nov 2026

Google Data Analytics Professional Certificate | Jan 2023 - Oct 2023

Skills

Microsoft Office, Power BI, SQL, JavaScript, Python, ticket triage (Jira, ServiceNow), software development lifecycle
